---

## **PROFESSIONAL SUMMARY**

- Front End Developer with an emphasis on JavaScript, HTML5 and CSS3.
- Completed an immersive 24-week coding boot camp at UNCC where I also learned MVC frameworks, JavaScript libraries and programming fundamentals.
- Great communication skills from over 10 years of sales/customer service which allows me to successfully work as a team to visualize and develop a product that fits the companies goals and positively impact revenue.

## **RELEVANT SKILLS**

- JavaScript(ES6)
- JS Libraries (jQuery, Bootstrap, Handlebars)
- HTML5
- CSS3
- MVC Frameworks (ReactJS, Express, NodeJS)
- JavaScript Testing (Mocha/Chai)
- NPM, Yarn
- Version Control with Git + GitHub
- AJAX & RESTful APIs
- Linux
- MySQL, MongoDB, Firebase
- Block-Chain (LotionJS)

## **PROFESSIONAL EXPERIENCE**

- UNCC BOOTCAMP, CHARLOTTE, NC MAR 2018 – AUG 2018
- **Project 1:** Coin Tracker <https://cmg87.github.io/Project-1/>
- Built application to track top 50 cryptocurrencies and provide relevant price and volume indexing using the coinmarketcap API.
- Used HTML, JavaScript, and CSS/Bootstrap and JQuery for look and design of the website.
- Has a pop-up modal feature to display the relevant information.
- Used Firebase to make a signup/login feature.
- Incorporated a news feed section using AJAX calls to news API to deliver top news about searched cryptocurrency.
- **Project 2:** KWIRI <https://cryptic-ridge-46275.herokuapp.com/#/>
- Built upon ReactJS framework
- Survey app that takes information from the PEW research institute and allows user to take the same survey and compare their results among the rest of the population.
- Used MySQL to manage database of questions and answers and statistics.
- **Project 3:** Fresh Off The Block <https://damp-sierra-65499.herokuapp.com/>
- Built Block-Chain chat application using ReactJS(front end/MVC), Express(server), LotionJS(Block-Chain framework)
- NGINX runs the block-chain on VPS using a NodeJS application manager PM2 to run block-chain in the background and serve up chat API using a reverse proxy through SSL encryption.
- PassportJS is used to verify user login and sign up which is stored using SHA256 encryption on MongoDB server.

- Express handles starting react server and middleware to send and receive requests from user database and block-chain.

---
